

DECLARATION OF AUTHORSHIP & AI USAGE

All investigative research, source selection, citations, maps, and evidence in this document were conducted by the author.

Artificial Intelligence (AI) was used strictly as a research assistant — to:

- Format and organize material,
- Surface supplemental case references when prompted,
- Refine grammar and presentation, and
- Generate AI timelines and visual summaries under direct human instruction.

At no point was AI trusted to generate original claims, citations, or legal conclusions without manual human verification.

All key evidence — including timelines, geographic overlays, statutory violations, and witness implications — were curated, cross-checked, and affirmed by the author using public records, visual analyses, and firsthand research.

The author retains full legal responsibility and authorship of all claims made herein.
