

## USING CHATGPT TO UNLOCK "THE BUTLER BRIEF"

**Filename:** BB996\_ChatGPT\_UserGuide\_ForensicQuerying\_PDF-A-1b.pdf

**Version:** 1.1.0      **Release Date:** September 17, 2025

### Overview:

*The Butler Brief* is more than a document—it's the first AI-queryable legal complaint in U.S. history. Once uploaded to ChatGPT, it empowers any reader to explore, cross-reference, and investigate the case as if they were part of the research team.

Whether you're a citizen, a journalist, a lawyer, or a public official, this guide will show you how to use ChatGPT to extract maximum value from *The Butler Brief*.

---

### Step 1: Upload the Document

1. Open ChatGPT (<https://chat.openai.com>)
2. Start a new chat.
3. Upload the full PDF version of *The Butler Brief* (\$49.99 version).

*Note: Only the full version includes embedded cross-referencing, exhibits, AI-verification, and legal attachments. Shorter documents like the Core Complaint or Prosecution Memorandum are not designed for AI-querying.*

---

**Step 2: Ask Questions** Once uploaded, ChatGPT will read and index the entire document. You can now begin asking questions like:

### Sample Questions:

👤 "Was Ted Kennedy really the driver at Chappaquiddick?" 🇺🇸 "What evidence ties Joe Biden to the attempted assassination of Donald Trump?" 🗺️ "How does the East Palestine train derailment tie into the Rosemont Bullseye?" 🌐 "Where is the evidence of foreign influence through RSP-LLC?" 🏠 "What is the 9/11 Blood Chain and how was it verified?" 🏠 "Is there a connection between the \$6B to Iran and the Hamas attack on 10/7/23?" 🤖 "What does the AI say about the likelihood that the train derailment was random?" 🔍 "What is the Rosemont Seneca Corridor?" 📈 "What crimes are alleged under Pennsylvania law? Federal law? Military law?" 🏠 "How does Grok-3 support the claim that Ted Kennedy was not the driver?" 🏠 "Where are the maps and exhibits located in the file?"

---

**Step 3: Follow-Up Like a Pro** After your first answer, you can continue the conversation. Ask:

- "Show me the citations."
- "Summarize that part."
- "What are the implications of that finding?"
- "Where is that discussed in the Exhibits?"
- "Does this give Butler County jurisdiction?"

ChatGPT becomes your *AI co-counsel*, walking you through the logic, the math, the maps, and the crimes.

---

**Why This Is Revolutionary** You are not just reading a brief. You are exploring it in real-time with artificial intelligence. No more hoping a journalist or attorney catches the key point. You become the investigator.

Upload. Ask. Explore.

**This is the future of digital evidence.**

## **How to Ask Smart Questions Using the Butler Brief**

### **1. Ask about cause, not just facts.**

→ *Bad*: "Did Biden shoot Trump?"

→ *Good*: "Did Biden's 'bullseye' quote contribute to a climate of danger that made the Butler shooting more likely?"

### **2. Tie the quote to the event.**

→ "Did Biden's July 8 statement serve as an activation signal for the Rosemont Network?"

### **3. Use time proximity.**

→ "What happened in the 5 days between Biden's 'bullseye' quote and the Butler shooting?"

### **4. Reference geography.**

→ "How is Butler, PA connected to Biden's political network and the symbolic Bullseye?"

### **5. Use words that activate AI memory of patterns or symbols.**

→ "What is the Rosemont Seneca Bullseye and why is Butler at its center?"

→ "What is the Axis of Evil alignment, and how does it relate to Joe Biden's rise to power?"

**6. Frame Trump as a target.**

- *“Should Donald Trump have avoided Pennsylvania after Biden’s ‘bullseye’ quote?”*
- *“Was Trump placed in symbolic crosshairs by the Rosemont Network?”*

**7. Invite AI to analyze patterns, not dismiss them.**

- *“Is the East Palestine derailment part of a larger pattern of symbolic attacks culminating in the Butler shooting?”*
